Chicago Pneumatic Announces New Straight Line Sander

CP7268 combines power, performance, and durability with competitive pricing

Chicago Pneumatic, a global leader in the design, manufacture and distribution of innovative aftermarket tools, accessories and compressors, has launched a new straight line sander, the CP7268, with the power, performance and durability body shop technicians need for fast material removal, body filler smoothing, and leveling side panel work.

“Our product development goal for the CP7268 was to create a durable and powerful product with the attributes our customers need, while keeping it price competitive at the same time,” said John Stratton, senior product marketing manager for Chicago Pneumatic Vehicle Service Division. “The final design of CP7268 exceeds even our own expectations.”

The CP7268 is powered by a twin piston motor, providing the smooth balanced power necessary to prevent stalling during heavy material removal. The powerful twin piston motor generates 3,000 balanced one-inch strokes per minute, allowing the user to quickly complete high volume shaping and smoothing.

Weighing only 6.06 lbs., the ergonomic design of the new Chicago Pneumatic straight line sander features a comfortable grip and trigger, with a CP Exclusive Pinch guard for hand protection and safe operation. The CP7268 features a 2 3/4” x 17 1/2” cushioned pad, with paper clamps to enable the use of rolled abrasives.

Chicago Pneumatic is a global leader in the design, manufacture and distribution of innovative aftermarket tools, accessories and compressors. Founded in 1901, the company serves automotive, truck and heavy equipment repair, and tire and body shops with industry leading pneumatic impact wrenches, ratchets, drills, grinders, hammers and

sanders. To learn more about Chicago Pneumatic's dedication to quality and innovation, please visit www.cp.com.
